

Turf Grass Seeds overview

ProSelect turfgrass seed blends have been developed for use on golf courses, sports fields, in turf/sod production. Varieties in the range are developed through extensive breeding by ICL and its international partners to bring the most up-to-date material to the market.

We also supply individual cultivars from the ICL portfolio to meet the specific needs in golf, sports and sod production.

ICL offers also a wide range of specially designed seed blends for landscapers.

ProSelect Turf Grass Seed Blends Index

Blend	Colour	Greens	Fairways	Tees	Roughs	Sports stadia	Training grounds	Racecourses	Outfields & Lawns	Sod Production	Quick Reference
		Golf			Sports

Turf grass species

- ***Agrostis stolonifera* – creeping bent grass**

New varieties appearing in the ICL range are specifically bred with integrated turf management in mind. The key aim is provide top performance with lower inputs.

- ***Agrostis capillaris* – browntop bent grass**

A more traditional bent grass for golf greens. The new releases are now proving to have lower demands for nutrients and water. Great disease resistance is a real strength of this species.

- ***Festuca rubra, commutata, trichophylla, trachyphylla, ovina* – fine fescues**

A range of fine fescues available, developed for a range of application from low maintenance to intensively managed areas.

- ***Festuca arundinacea* – tall fescue**

A deep rooting, drought tolerant species which forms a very important part of the ICL programme, particularly for southern Europe.

- ***Poa pratensis* – Kentucky bluegrass**

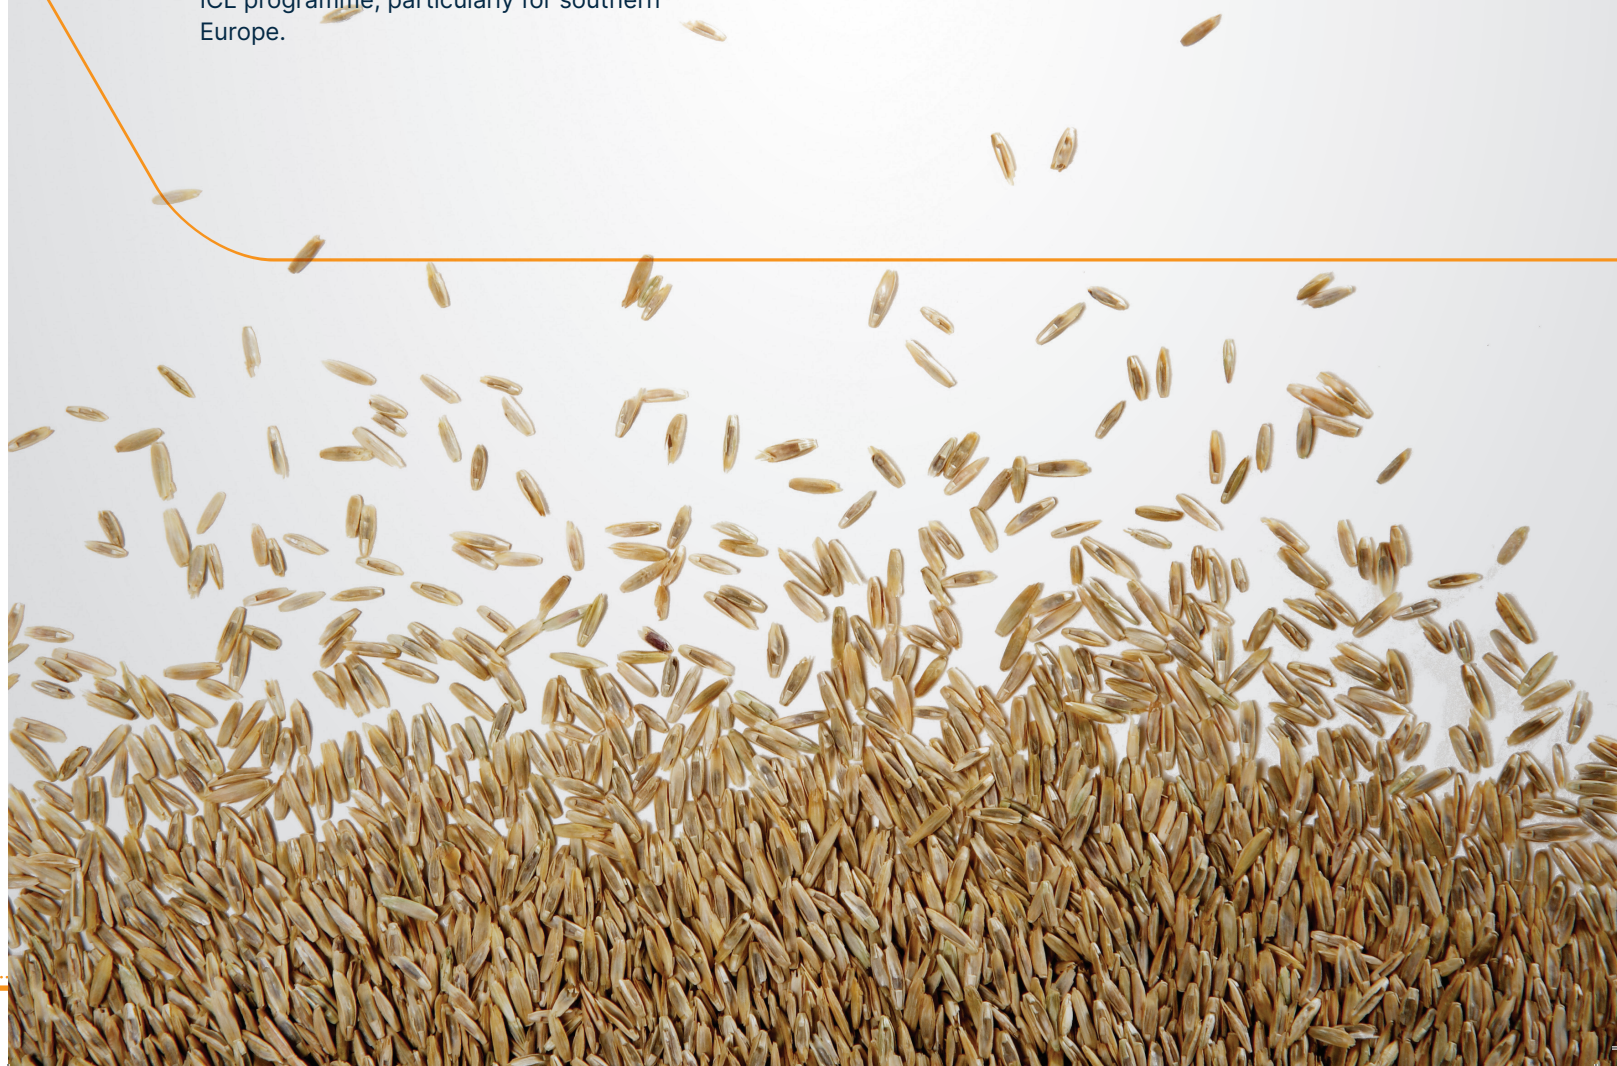

ICL can boast in having probably one of the most extensive ranges of Kentucky bluegrass. There are many characteristics on offer from highly aggressive rooting hybrid varieties to high wear tolerance types.

- ***Lolium perenne* – perennial ryegrass**

One of the most widely used species in the sports turf world. The ICL portfolio includes US and European genetics to cover all manner of applications.

- **Specialist species**

Due to the diverse range of climatic regions we work within, ICL offers certain species that are adapted to difficult growing conditions. These include *Paspalum*, *Zoysia*, Bermuda and hard fescues.
